xPrintServer™ is an easy-to-use, affordable 'plug-and-print' solution for Apple® iOS devices, enabling wireless printing from the native iOS print menu to USB & networked printers.

xPrintServer™ enables printing for iOS devices such as iPads® and iPhones® using their native print menu. It eliminates the need to print through apps, install software, or email yourself documents for printing. And more importantly, you don't need to buy a new printer because xPrintServer—Home Edition works with virtually any USB and network printer. What's more, xPrintServer Home Edition also enables printing to USB printers from Mac OS® X Lion and Windows® (XP, 7).

Set-Up is Automatic & Quick!
Simply plug the xPrintServer into your network (router or switch with wireless access point), then plug your USB printer(s) into the xPrintServer. Within seconds the xPrintServer will auto-discover your printers to enable printing from iPads® and iPhones®.

Print From Many iOS Devices To Many Printers!
Each xPrintServer supports unlimited iOS devices, up-to 8 USB printers and up-to 2 network printers. USB hub required to connect more than 1 USB printer (not included).

xPrintServer Highlights:

- Print to virtually any printer - no need to buy new printers
- No apps or software to buy or load
- Easy to use / automatic discovery and set up of printers
- Print directly from the iOS native menu
- Supports more than 4,000 top brand network printers
- Advanced configuration options via web interface
- USB printer(s) can be shared over a home network*

xPrintServer™

Open it. Plug it in. Print.
