

Next generation access control solution for Micro- and Small-Enterprise

What is JustPass?

JustPass is a palm vein recognition based biometric access control solution for clients with smaller infrastructures. JustPass is a next generation biometric system, now also available for Micro- and Small-Enterprises (from the price perspective). It offers an off-the-shelf, cost-effective alternative to traditional access control systems, with high security and convenience. At the same time, JustPass has a simple infrastructure, which can be used for 1:n authentication. The system can be used by up to 150 people and 8 authentication points (for larger systems, GateKeeper can be provided).

What are the key arguments for JustPass You should mention to the Customer?

- ⚙ Increases the security level without compromising convenience, it is **as easy as using an RFID** but no security risks or inconveniences are involved (the user only needs his/her hand, which is absolutely unique for everyone and cannot be lost, stolen, copied or reproduced)
- ⚙ It is fast, **biometric authentication takes only 1 second**
- ⚙ It can be also used **contactless for higher hygiene**
- ⚙ It can be either used for **replacing or completing RFID cards**, thus ensuring a cost effective solution
- ⚙ There is **no need for a complicated server environment**, the system can be installed easily
- ⚙ The BioSec system has proven that it is simple to use for anyone, regardless of age or abilities, it is **"user friendly" on highest level**
- ⚙ Fast project realisation, short lead times
- ⚙ **Low maintenance costs, no active devices in the system, no IT expert is needed**

What are the main benefits of GateKeeper compared to competitors?

- ⚙ Palm vein recognition is **a market proven biometric solution** (the vein ID cannot be copied, stolen as in case of other technologies using surface characteristics, better FAR and FRR rate than other solutions) **measures up to 5 000 000 reference points** (fingerprint 12-120 points), thus one of the **most unique biometric IDs**.
- ⚙ JustPass has been specially created for **Micro- and Small-Enterprises so they can also afford a high security and convenient access control system** without compromises. No server environment is needed
- ⚙ First time, palm vein recognition (as a next generation biometric technology) is also available for Micro- and Small-Enterprises
- ⚙ Off-the-shelf product
- ⚙ FAR 0,00008%, FAR <1%

What are some of the target groups?

- | | |
|-----------------------------------|-----------------|
| ⚙ Small companies with <150 users | ⚙ Law firms |
| ⚙ Doctor offices | ⚙ Nursing homes |
| ⚙ Kindergarten | ⚙ Libraries |
| ⚙ Pharmacies | ⚙ etc. |

What are the core technical information you should mention?

- | | |
|--------------------------------------|------------------------------------------|
| ⚙ ~1 second authentication time | ⚙ No server environment needed |
| ⚙ Real time system diagnosis feature | ⚙ Triple1 biometric reader for all needs |
| ⚙ Contactless use possible | ⚙ Controllers are preinstalled |
