

# LOFT

by **FERMAX**

## VIDEO DOOR ENTRY SYSTEM

### HANDS-FREE LOFT

The **LOFT COMPACT monitor** is the Loft line compact version. Its reduced size allows installation where there used to be a door entry telephone.

In the colour version, the **hands-free function** allows to communicate with the visitor with no need of a handset.

## COMPACT DESIGN

The monitor is designed in high-impact ABS plastic with textured finish and ultraviolet protection for greater resistance.

Available in **B/W** and **Colour**. Installation can be surface or flush mounted.

It is 133 mm wide, which generally allows installation where the telephone used to be.

## OPERATION WITHOUT HANDSET

When a call is received, the image comes on screen automatically.

Press  to activate hands-free communication, which ends when  is pressed again or after a few seconds.

Built-in as standard: pick up/hang up button, button to open the door and call guard unit , autostart camera switch , activation of 2 additional functions, volume control and brightness-contrast-colour selection.

## ACCESSORIES

**Decorative frame** acts as aesthetic complement to cover gaps in the wall left by old equipment. Essential if you wish to embed the monitor.
