INK1000

Modern, Efficient Card Printing Made Easy

HID® FARGO® INK1000, a highly-specialized thermal inkjet printer that keeps cost low and quality high.

Resolution that Brings Your Brand to Life

Powerful Images 600 x 1200 dpi high resolution — even accommodates elaborate designs and complex characters like Kanji, Arabic and Cyrillic.

Technology Ready Create scannable barcodes and print on chip-embedded cards without voids or white areas.

True Edge-to-Edge Printing Print full card coverage designs in intricate detail.

Seamless Card Compatibility

Print perfectly on PVC, press-polished PVC, composite PET/PVC and laminated PVC.

Versatile Card Applications

Add the optional contactless card encoding module to access a variety of applications without changing the look of the card, like:

- **Contactless door entry**
- **Cashless vending**
- **Time & attendance**
- **Gift/Loyalty cards**
- **QR code-based financial cards**

Countertop Convenience

The compact design fits easily on countertops or desktops.

Fade Resistance
Text and images inherently resist UV fade without expensive overlays

Less Waste
No ribbon panels creating unnecessary waste

Improved Security
Used inkjet cartridges do not leave behind sensitive information

Less Maintenance
As simple to operate and maintain as your home inkjet printer

Lower Total Cost of Ownership
Fewer consumables and no expensive printheads to replace
