BACKSET MODELS

DUO 25/85	25 mm
DUO 30/85	30 mm
DUO 35/85	35 mm
DUO 50/85	50 mm

The electric deadbolt DUO has an electrical part installed into the door frame and a mechanical part mortised into the door panel. It allows an automatic closing thanks to the mechanical deadbolt without using the key.

From outside the door can be opened by the key or by a remote control or by normal intercom/Access Control. From inside the door is opened mechanically thanks to the antipanic handle or electrically thanks to the push button.

SECURITY

Using DUO, the door will be always secured by the deadbolt as it is a deadlocking deadbolt.

EASY USE

Stop arguing with neighbors about who didn't lock the door at night, stop going downstairs to lock the door at night, DUO always keeps the door locked.

ALL FUNCTIONS

With or without electrical power, you can always lock or open DUO.

EASY TO INSTALL

There is no need to wire the panel door. The mechanical part can work with short or long cam cylinder. All backsets and dimensions are suitable.

LOW CONSUMPTION

DUO works with 900-1200mA in VAC-VDC.

LOW COST

The cheapest closing electro-mechanical product for everybody.
